Nestled within the settlement known as Top Warren, off Warren Lane, Chapeltown, this exquisite individual bungalow, designed and built by the current owners, offers a perfect blend of modern efficient living within a serene setting. This contemporary impressive modern open plan property living space, has been carefully planned with attention to detail, to provide an ideal environment for relaxation and entertaining. Boasting underfloor heating throughout the whole property, it ensures a warm and comfortable ambiance all year round. High standards are apparent too, including maintenance free UPVC skirting and architrave throughout, together with whiteboard wipe down window sills and thresholds. Another extra touch is the wide opening doorways which lead into each room - making for easy access throughout the dwelling. The primary bedroom, features French doors to the garden and offers both an en-suite and separate dressing area. The garden allows for various sitting areas together with a further plot area, which subject to planning consent could enable an annex for dependent relative(s) or a teenage growing family member to provide for their own independence. A generous frontage driveway of a graveled sustainable urban drainage system (SUDS) leads to the double garage with roller shutter and side door access. The in-roof solar 4.2 kw system provides economical electricity to the 5kw Vaillant air source heat pump (still under warranty) which contributes to below average utility bills and refunds of unused electric kilowatts, through the smart energy generation (SEG) of which the owner can provide the documentation to support this, making it to be one of the few EPC 'A' Rated properties within the S35 location.
